GOOD LIVING

Quite often results in bad health, because what is termed "good living" is usually the gratification of the palate without reference to the nutrition of the body. When the good liver is a business man and rises from a full meal to plunge at once into work requiring mental effort the result is almost sure to be disastrous, because digestion draws upon the same nervous forces which are employed in thought. In time the stomach and nutrition are imperfectly performed and there is a physical breakdown.

Dr. Pierce's Golden Medical Discovery has proved a great blessing to me. I had doctor after doctor for several years, going through a course of treatment without any real benefit. In September, 1902, I had very sick spells and a general ailment. I commenced in and in a short time I could eat and work. I have gained twenty pounds in two months.

FREE. Dr. Pierce's Common Sense Medical Advice is sent free on receipt of stamps to pay expense of mailing only. Send at once stamps for the book in paper covers, or at stamps for the cloth-bound volume. Address Dr. R. W. Pierce, Buffalo, N. Y.

VOLCANIC.

OUTBREAK SURPASSING THE HORROR OF SATURDAY.

About Two Thousand People Perish on the Ill-Fated Island of Martinique.

Over 1,500 Persons Killed During the Previous Eruption.

RELIEF MOVEMENT IS BEGUN.

Castries, Island of St. Lucia, B. W. I., Sept. 5.—8 p. m.—The Royal Mail steamer Yare arrived here this evening from the island of Martinique. She brings the report that a violent volcanic eruption occurred there last night, and that about 2,000 persons are said to have perished. Large numbers of people are leaving the island.

AWFUL PHENOMENA. London, Sept. 5.—The correspondent of the Daily Mail at Castries, St. Lucia, has cabled the following account of the phenomena witnessed at the time of the recent outbreak of Mont Pelée, Martinique:

"Between 8 and 9 o'clock in the evening of August 30 a spectacle of terrible grandeur was witnessed from here. A pitch black cloud hung over the island of Martinique, through which shot at intervals pillars of flame high in the sky, which broke in fantastic forms of colored fire and scattered showers of fiery sparks. About midnight clouds were darting about like millions of fire flies, and above all these large aureoles appeared in the sky.

The correspondent then proceeds to confirm the details of the eruption as already known, and says:

"There was tremendous earth rumbling and explosions. The ground rocked and nothing could stand on tables or shelves. Boats for St. Pierre were unable to reach the town owing to the fall of hot ashes and a tidal wave destroyed the whole of the sea front of Le Carbet.

"People returned here from Martinique only last week to take back their families to Fort De France."

MORNE CAPOTE DAMAGED. Paris, Sept. 5.—The ministry for the colonies received a cable dispatch today from the Governor of Guadeloupe, M. Merin, saying that Morné Capote was much damaged by the recent eruption of Mont Pelée. Basse Pointe heights were burned.

The Minister of the Colonies, M. Doumergue, in placing \$100,000 at the disposition of the Governor of Martinique, M. Lemaire, to relieve the distress in that island, has urged the Governor not to congregate refugees at Fort De France, but to distribute them in the south, where their necessities can be most easily supplied.

Recognizing the danger of a tidal wave at Fort De France, the Colonial Minister has instructed Gov. Lemaire to adopt all the measures necessary to enable the inhabitants to immediately evacuate the place in case of necessity and seek refuge on the heights above the town, where food depots should be established. The Minister has also recommended the establishment of observatory posts where the least fresh outbreak of Mont Pelée can be immediately reported to the authorities.

GREATLY ALARMED. Paris, Sept. 5.—The Paris edition of the New York Herald publishes a dispatch from Point-a-Pitre, Island of Guadeloupe, French West Indies, dated September 4, which says that constant detonations heard there last night indicated a terrific volcanic eruption on the island of Martinique. Thick, black clouds were seen to the southward of Guadeloupe and the heat at Point-a-Pitre was intense. The population was said to be greatly alarmed with apprehension of a tidal wave in the event of the collapse of Martinique.

OVER 1,500 PROPERLY KILLED. Roseau, Island of Dominica, D. W. I., Sept. 5.—A copy of L'Opinion, of Fort De France, Martinique, dated September 4, says that over 1,500 persons were killed during the volcanic eruption of Mont Pelée of last Saturday, and that a still greater number of persons has been brought to Fort De France by the French cruisers Tigre and Suchet and by coasting craft. The hospitals of Fort De France are filled with the sick and wounded.

SCHWAB SENDS INQUIRY. New York, Sept. 5.—Gustav Schwab, chairman of the committee having charge of the distribution of funds collected for the relief of sufferers from the Martinique disaster several

months ago, sent the following cablegram to-day:

Gov. Llewellyn, St. Vincent: Does recent disaster requires further aid to your island or Martinique? If so of what nature? Cable to Martinique not working. Reply collect.

SCHWAB, Chairman West Indian Committee. SUN OBSCURED AT CASTRIES. Castries, Island of St. Lucia, B. W. I., Sept. 5.—It was quite dark here at 5:30 o'clock this morning. At that hour the sun was obscured as it is during an eclipse. The British steamer Savan, Capt. Hunter, arrived here to-day from the island of Trinidad. She was covered with dust, and reports that she ran into a dense cloud of dust while twenty miles south of St. Vincent.

REPORTS HEARD AT CARPANO. Paris, Sept. 5.—In a dispatch from Carpamo, Venezuela, a correspondent of the Figaro says: "Violent detonations were heard here from 10 o'clock in the evening of September 3, until 4 o'clock in the morning of September 4; the sounds came from the north, and were identical with those heard the night of August 30, during the volcanic eruption on Martinique of that date."

LOUD DETONATIONS HEARD. Point-a-Pitre, Island of Guadeloupe, F. W. I., Sept. 5, 3 p. m.—Loud detonations were heard here last night in the direction of Mont Pelée.

A Certain Cure for Dysentery and Diarrhoea. "Some years ago I was one of a party that intended making a long bicycle trip," says F. L. Taylor, of New Albany, Bradford county, Pa. "I was taken suddenly with diarrhoea, and was about to give up the trip, when editor Ward, of the Laceyville Messenger, suggested that I take a dose of Chamberlain's Colic, Cholera and Diarrhoea Remedy. I purchased a bottle and took two doses, one before starting and one on the route. I made the trip successfully, and never felt any ill effect. Again last summer I was almost completely run down with an attack of dysentery. I bought a bottle of this same remedy, and this time one dose cured me." For sale by all druggists.

Has Benefitted Montana. Before the direful Wilson-Gorman Free-Trade law, which brought Montana wool as low as six cents a pound, that commodity sold as high as twenty-two cents. That was under the McKinley Protective Tariff law. Now, under the Dingley law, wool is selling at nearly three times the prices that prevailed during the Democratic administration. Not only wool, but sheep and cattle, which are Montana staple products, are bringing top prices. Montana is prospering under these conditions. Combined with favorable weather and mild winters, the stock product of the State has rapidly increased, and the cattle are in better shape for market than ever before. But if the Tariff was taken off wool and cattle and the South American, Mexican and Canadian products were allowed to come in free of duty there would be a different story to tell.

Montana has been directly benefited by Republican policy, as has been demonstrated in many ways, and our farmers, stock and wool growers are ready to testify to the beneficial results of a Protective Tariff. If the issue should be made in 1904, as asserted by some, on Protection or Free-Trade—under the false name of Tariff reform—there can be no doubt as to how the people of this State will vote. They are not like the Democrats of the South, who admit that a Protective Tariff has been the salvation of that section, bringing greater wealth and prosperity than they ever dared dream of, and still vote for Free-Trade Democrats.—Helen (Mont.) Record.

A man who has tried it says: "I was obliged to quit work on account of biliousness. After using one box of Ramon's Liver Pills and Tonic Pellets I was restored to perfect health." They are for everyone. Even the most delicate person may use them with beneficial result.

Free-Traders, of course, are not worried about the "evils" of any particular schedule of the Tariff—they would abolish it entire.

Ramon's Tonic Liver Pills have no equal as a liver medicine. Try them for any chronic case of disordered liver and you will be entirely satisfied with the result. Just one before retiring.

The Plea vs. the Picture. In the editorial column of the New York "American and Journal" of August 6 was a wall against the Tariff as the mother of trusts and the author of all evil to the country. Beside it was a picture—John Bull awaking from a Rip Van Winkle slumber, his clothes in tatters, the skeleton of his dog beside him labeled, "British Trade," his gun—"British Military Prestige"—a rusted wreck—while in clear view were fac-

tories with smoking chimneys, warehouses, wharves heaped with merchandise and great ships on the sea—all American property. If the editorial was eloquent with its mistaken plea, the picture was more eloquent in behalf of that great home-building system, Protection, under which the United States has proven the marvel of the world and for the lack of which British manufacturers have suffered defeat and decay.

Wants to Help Settle. Editor Messenger: Your statement in the Messenger of September 3d, concerning the changing the Sixth judicial primary back to November 4, as originally fixed, came to my notice to-day.

In regard to the change from the original date I desire to say, I had nothing to do with the change, and knew of no contemplated change, but supposed that the date as originally fixed was final, and have made my canvass to that end. When the committee met on June 14th Mr. LaVega Clements, representing me, suggested to the committee that the date be fixed for the judicial primary on November 4th in order to bring out a full vote in the district, which would in my opinion put the election of Judge Settle for appellate judge beyond question. This was an original suggestion of my friends and myself.

So far as my individual candidacy is concerned, I am willing to take my chances of securing the nomination for Circuit Judge on any date the committee may fix, but think the welfare of the Democratic party is the paramount question to be considered, and whatever will promote the election of a Democrat as Judge of the Court of Appeals is the thing all Democrats desire to have done. So far as the party is concerned it matters not whether my worthy opponent or myself secures the nomination, this district will have a Democratic circuit judge, but the more vital question is, are we going to elect Judge Settle to the appellate bench? And with one accord this should be emphatically answered by every Democrat. "We are going to elect him." My opinion has ever been that this end can be more surely accomplished by having the judicial primary on November 4th, and having this view I heartily endorse your suggestion that the date should be changed back by the committee, to November 4th, and will join in a petition to the committee for this purpose.

So far as the expense of holding the primary election is concerned, I am ready to pay my part of the expense, let it be held at any time or place. Expense is not the question, but Democratic success is the only thing to consider. I shall insist, as I have in my canvass, that all Democrats, whether they be for my opponent or myself for circuit judge, go to the polls, vote the Democratic ticket, and when that duty is performed, then take his choice between us.

Respectfully, T. F. BIRKHEAD, September 4, 1902.

Josh Westhaver, of Loogootee, Ind., is a poor man, but he says he would not be without Chamberlain's Pain Balm if it cost five dollars a bottle, for it saved him from being a cripple. Said the Arkansas Traveler. "Why don't you fix up your roof?" said the traveler in Arkansas to the fiddling squatter. "Because," was the reply, "when it rains, I can't, and when it don't rain it don't leak." Something like this crude bit of logic might be applied, with a difference, in answer to the free trade and "progressive" demand that the Republican party fix up its tariff roof: "Because, when the storm of adversity comes, the only way to fix it would be to make it tighter. And when the sun of prosperity shines it is alright without any fixing."—American Economist.

A Venerable Saint. After preaching and starving for 30 years in Logville, dear old Parson Rigdon made up his mind to change his field of labor. He had received another call and the little congregation had gathered together in the little wooden church to hear the last farewell words of the venerable saint.

After singing "Nearer, My God, to Thee," and offering a prayer that brought tears to the eyes of the congregation, the parson wiped his eyes and said:

"Brothers and sisters, I have called you together to-night to say farewell. After ministering to you for 30 years I don't think the Lord loves this people very much, for few of you have died. The Lord don't seem to want you. And I don't think you love each other, for I've never married any of you—and I don't think you love me, for you don't pay me my salary—and your donations are mouldy fruits and wormy apples—by their fruits ye shall know them."

"And now, brothers, I've called you together to say farewell—a farewell! The Lord has called me to another place. I have been appointed chaplain of the penitentiary at Joliet. Where I go ye cannot come, now but I go to prepare a place for you."

Uninterrupted Prosperity. Representative Cannon, of Illinois, chairman of the House Committee on Appropriations, and one of the most able members of the House, voices the sentiment of the great majority of the people of the country when he says that there is no desire anywhere among the business interests of the country for a revision of the tariff by the next session of Congress, which would mean a year of uncertainty to check the prosperity which is now being so generally enjoyed. As Mr. Cannon says, the minute revision of the tariff begins there is a halt all along the line, the manufacturer waiting to see what the result will be before he branches out extensively, the merchant buying only what he is very certain he can sell, and the consumer purchasing only what he needs.

Mr. Cannon speaks the truth when he declares that there will be no general revision by the present Congress or the succeeding Congress, unless there should be a check in the present prosperity. The business of the country cannot afford to have any obstacle intervene to prevent the carrying out of the comprehensive plans for improvement, and it is certain that that radical tariff revision agitation would be a blow to labor which would be felt in every quarter of the country.

All the people now ask is to be let alone to pursue their successful course without annoyance or comprehension.—Troy Record.

"In dealing with man, remember that a spoonful of oil will go farther than a gallon of vinegar." The same may be said of children. There is nothing so good for children as the old-fashioned castor oil. However much they may abhor it, it is their best medicine for disorders of the bowels. In the more severe cases of diarrhoea and dysentery, however, Chamberlain's Colic, Cholera and Diarrhoea Remedy should be given after the oil operates, and a quick cure is sure to follow. Women as Well as Men Are Made Miserable by Kidney Trouble. Kidney trouble preys upon the mind, discourages and lessens ambition; beauty, vigor and cheerfulness soon disappear when the kidneys are of order or diseased.

Kidney trouble has become so prevalent for a child to be born afflicted with weak kidneys. If the child urinates too often, if the urine scalds the flesh or if, when the child reaches an age when it should be able to control the passage, it is yet afflicted with bed-wetting, depend upon it, the cause of the difficulty is kidney trouble, and the first step should be towards the treatment of these important organs. This unpleasant trouble is due to a diseased condition of the kidneys and bladder and not to a habit as most people suppose.

Women as well as men are made miserable with kidney and bladder trouble, and both need the same great remedy. The mild and the immediate effect of Swamp-Root is soon realized. It is sold by druggists, in fifty-cent and one dollar sizes. You may have a sample bottle by mail free, also pamphlet telling how to keep back all about it, including many of the thousands of testimonial letters received from sufferers cured. In writing Dr. Kilmer & Co., Binghamton, N. Y., be sure and mention this paper.

Swamp-Root is a vegetable preparation absolutely harmless in its effect; it acts gently on the kidneys, liver and bowels; cures constipation, biliousness, sick headache, clears the complexion and makes the blood pure. An ideal remedy for children as well as adults.

We have only to look at prosperity as it exists in Iowa and all our cities and villages to be convinced that the people want no administrative changes. Labor is employed and capital is reaching out in investments in every direction. It is a little wonder that business men, or the men with their little homes, are satisfied with their present conditions and desire to let well enough alone.—Davenport (Ia.) Republican.

Kings That Have Never Been Crowned. King Christian, of Denmark, father of Queen Alexandra, has ruled almost forty years—since 1863—and has yet to be crowned. He was proclaimed King from the palace of Christianborg.

The new King of Italy has not been crowned, and if Victor Emmanuel follows the example of his father, Humbert I, he never will be. This is more strange as the crown of Italy, the Iron Crown of Lombardy, is the most ancient and historic crown in the world. The Iron part of it, which is almost completely in gold and jewels, is said to have been made of nails from the cross on which the Savior was crucified, and the gold was laid on

Dr. J. A. Simpson, Secretary of the Board of Education of San Francisco, Cal., writes:

"I have found Peruna an ideal tonic. Some months ago I suffered with neurasthenia (systemic catarrh), caused by too close application to office work. My system seemed worn out and I felt far from well. I found Peruna benefited me very much. It built up the entire system and made me feel like a new man. I believe it is well worthy the high praise bestowed upon it."

Systemic catarrh always gives fair warning of its approach, and can be easily ward off by the proper treatment. Floating brown specks before the eyes, mental confusion, fits of nervous headache, sleeplessness, flashes of heat, chilly sensations, palpitation, irritability, despondency; any of these symptoms or all of them should be promptly met by the use of Peruna.

Congressman E. V. Brookshire, from Indiana, in a recent letter from Washington, D. C., says:

for the protection of the precious metal. In its present shape, the crown crowns dates from 395. It was one of the most valuable possessions of the Emperor Constantine. It crowned the Lombard kings. The last two occasions on which it was used for coronation purposes was in 1805, when Napoleon, who had carried it off to Paris, made the Pope crown him with it in the Cathedral of Notre Dame in 1838, when Ferdinand I, of Austria, was crowned with it at Milan. Its last public appearance was on the bier of the assassinated Humbert, two years ago. It is said that threats of force had to be made to the priests who have in charge the Iron Crown before they would allow it to be used on the coffin.

We have only to look at prosperity as it exists in Iowa and all our cities and villages to be convinced that the people want no administrative changes. Labor is employed and capital is reaching out in investments in every direction. It is a little wonder that business men, or the men with their little homes, are satisfied with their present conditions and desire to let well enough alone.—Davenport (Ia.) Republican.

Kings That Have Never Been Crowned. King Christian, of Denmark, father of Queen Alexandra, has ruled almost forty years—since 1863—and has yet to be crowned. He was proclaimed King from the palace of Christianborg.

The new King of Italy has not been crowned, and if Victor Emmanuel follows the example of his father, Humbert I, he never will be. This is more strange as the crown of Italy, the Iron Crown of Lombardy, is the most ancient and historic crown in the world. The Iron part of it, which is almost completely in gold and jewels, is said to have been made of nails from the cross on which the Savior was crucified, and the gold was laid on

A YOUNG WOMAN

Over Whose Shame Death Charitably Draws Its Mantle.

While passing the undertaker's establishment Wednesday morning, we observed the always sad spectacle of a coffin being prepared for somebody's dead. Inquiry brought to light a sad story of a young woman's misfortune, over which death had charitably drawn its dark impenetrable curtains. Grace (Galley), sixteen-year-old daughter of Mrs. Hannah Reddish, died of childbirth at the residence of her mother, near Horton, Tuesday night, and was buried at Bethel burying ground Wednesday.

The girl was of that tender age when trust is too often tribute to a stronger will, and life too often the price of unbounded faith. To the writer the fullness of the fury of hell bursts upon society in incidents like this. If there is a sin for which agony, tears and blood will not buy a pardon, he commits it who dismantles the honor of a sweet young, trusting girl, and if there is a spectre, weird and dark, inspiring awe and fear, it should haunt him to the grave.

In this another warning tower is raised aloft along life's stormy coast, and yet trusting girls rush rashly on to wreck and ruin.

Declined to be Measured.

A representative of the American Express Company visited Boatner and Schlietbaum, who are charged with attempting to rob that company of \$28,000, at the jail here Monday and asked the privilege of making a Bertillon measurement of the prisoners. Boatner commenced to undress, but when he had removed one shoe, hesitated a moment, replaced it, and remarked to the express man that he believed he would not be measured. "You should allow the measurement to be taken," the express man persisted; "if you are innocent, as you say, it cannot hurt you."

"It can do me neither good nor harm," Boatner calmly replied, "but not being persuaded that you are here especially to help me, I don't care to go to the trouble of undressing." And he didn't.

Wanted for Seduction.

Deputy Sheriff John G. and Clarence Keown had quite a chase Sunday in pursuit of one Thomas Bennett, of Henderson county, who is wanted at Owensboro to answer a charge of seduction. Bennett was arrested and tried upon the same charge at Henderson, but as the offense was committed in Daviess county the prosecution was dismissed. Later he was indicted in Daviess county and Deputy Sheriff Lawson of that county arrived in Hartford early Sunday morning and accompanied by the Deputy Sheriff mentioned, went in pursuit of Bennett, who was supposed to be located just below Centertown. Bennett, by some means, learned that he was being pursued and eluded the officers. After an all day search the officers concluded Bennett had crossed over to McLean county. The Ohio county deputies gave up the search at nightfall and returned home. Sheriff Lawson went to Livermore, and securing the assistance of the marshal of that town, and continued the pursuit. Sometime Sunday night the officers overtook Bennett, and Lawson took him to Owensboro where he gave bond and was released.

SEVEN PRISONERS

In the County Jail and all are Innocent and Cheerful.

There are now seven prisoners confined in the county jail. A. B. Schlietbaum and J. H. Boatner, charged with attempting to rob the American Express Company of \$28,000. Netter Gilstrap charged with the murder of Thomas Burton. Effie Bartlett, charged with infanticide. Alvin Baker, (colored,) charged with shooting and wounding, and Sullenger and Cunningham, two Leitchfield negroes, charged with robbing Alfred Stewart.

We visited the prisoners yesterday morning and found them all in good health and as cheerful as the situation would warrant. They are each innocent, of course, as all prisoners are. Among several hundred prisoners we have interviewed in the past four years, only one has said he was guilty, and we plead with the court to turn him out before he contaminated the morals of a half a score of innocent prisoners.

Schlietbaum and Boatner are well dressed, wear collars, cuffs and ties, and present a very gentlemanly appearance. They talk like men who, whether guilty or innocent, have hopes for the future.

Alvin Baker is as cheerful as a June bug because the prosecuting witness in his case is away up north, and Baker wishes for nothing so much as the coming of the November term of the Circuit Court.

Sullenger and Cunningham are taking things easy and express anxiety for their examining trial which is set for Monday.

The woman, Effie Bartlett, occupies the corridor, and claims, like the rest of the prisoners, to be innocent of the charge against her. She is taking prison life philosophically, and expresses her anxiety for the approach of the November term of court when she can return to her husband and home in Daviess county.

Six Months in Hartford.

The good citizen out in the county, who has not visited to Hartford since the first of the year, may witness the following substantial improvements in the town:

Fair & Co's refitted storeroom with one of the nicest stock of goods in Western Kentucky.

Sam Bach's spacious, well filled storehouse.

Carson Bros' large well-stocked grocery.

W. S. Tinsley's splendid stock of hardware and groceries.

Turley & Co's big warehouses full of farming implements and vehicles.

The First National Bank and Commercial Hotel in the big, new \$12,000 Riley building.

THE REPUBLICAN's nice, new brick offices nearing completion.

B. B. Collins & Co's new saw and planing mill.

R. L. Tweddell's shingle factory and grist mill.

C. M. Barnett's residence occupied by Mr. Frank Lowe.

G. B. Likens' new residence.

Dave Baldwin's new residence.

Will Fair's new residence.

King's new residence.

Willie Bean's new residence.

Richard Ross' new residence.

New concrete pavements, and various other minor improvements to numerous to mention. If you don't have any special business here it will pay you to come in just to note the very decided improvements in the old town.

Stealing railroad engines. A most picturesque and sensational episode of the Civil War.

In June, 1861, "Stonewall" Jackson under orders from General Johnson, proceeded to Martinsburg on the Baltimore & Ohio R. R. and burned a number of cars and engines. Then it occurred to one of his officers that the burning was a wanton waste, as the Confederate roads were in need of railroad equipment. Consequently the fires were put out, the locomotives dismantled and hauled by horses and men down the pike eighteen miles to Winchester, where they were again mounted on the railway tracks and hurried to Strasburg. Elated with the astounding success of their first enterprise, the Confederates continued to help themselves to other locomotives, steel rails, etc.—B. & O. property—every time they captured the road. Nineteen locomotives were thus purloined in less than a year. They were mostly of the "camel-back" type—the last of which was but recently presented to the Purdue University at Lafayette, Ind., by the Baltimore & Ohio R. R. The brilliancy of this great feat in engineering was accredited to Col. Thomas R. Sharp, who was made master of transportation of the B. & O. at the close of the war.

When arranging your trip to Washington for the 36th Annual Encampment, keep the B. & O. in mind and go over the same route you traveled in '61.

Very low rates will be made from all points on the B. & O. S-W, ask your nearest Ticket Agent for particulars—or address.

Hick's Weather for September.

Our storm diagram shows a strong combination of disturbing causes bearing on the opening days of September. From the 1st to the 4th falls the culmination of a regular Vulcan period, intensified by Mercury, Mars and Earth, with new moon on the 1st and Moon on the celestial equator on the 3rd. Warm weather generally will most likely prevail at the opening of the month, with falling barometer, growing humidity, and other storm indications spreading eastward from west and southwest.

On and touching the 2nd to 4th no one should be surprised by energetic storms of rain, wind and thunder. This is one of the autumnal equinoctial periods in which heavy equatorial storms are quite probable, in all southern waters, and around all coasts exposed to the ravages of these West India storms. No sane person will be alarmed at this cautious admonition. Nothing out of nature's ordinary and normal course is indicated; but nature's ordinary way, under existing astronomical conditions at this time, might make it dangerous for people in the sections named, who give no thought to the subject and pay no timely attention to indications.

If very low barometer and West India hurricanes reach our south coasts at this time they will either reach interior sections, and travel thence to the lakes and St. Lawrence causing high temperature and heavy storms of rain, wind and thunder over most of the country, or they will move up the Atlantic coasts, causing danger in those regions and bringing high barometer, northerly winds and quite calm weather over all northern and central parts of the country. Timely and positive indications as to which way matters will turn, will appear to all who pay attention to the subject. The chances are that frosts will occur northward about the 10th to the 12th.

The elements will react into storm conditions of more or less energy, progressing from west to east about the 7th to 9th. The center of the Mars period falls on the 11th, and on and about this date, it must be remembered, our globe reaches a crisis or maximum of magnetic and electric excitement, as a rule causing many curious phenomena in earth and air. Electrical storms, earth currents, an-

The Beef Trust and the President
It was announced a short time ago that the packers of the country would form a gigantic trust on the line of the steel trust, to be capitalized at five hundred millions of dollars.

Under the administration of President Roosevelt the formation of trusts is becoming more and more difficult. The officers of the United States were instructed to take steps to determine how far this trust would violate the law and prevent any violation if possible.

Following these instructions, the President has been discussing with the people in a calm, dispassionate, and statesmanlike manner the evils of trusts and their remedies. These speeches of the President have been criticised from two quarters. The Democrats have declared there was nothing in them; that they were mere platitudes; that the President was dealing in generalities; that nothing would come of his professed opposition to trusts.

One of the first results of the President's attitude has been the abandonment of the attempt to organize the packinghouse trust, as the following dispatch from Boston shows:

The combination of the big packing-house interests has been stopped suddenly. Schedules of property, which were being made in Boston and elsewhere in England, to be filed at Chicago as a basis for taking over all the independent concerns, were made up in a hurry and were all ready to send on Monday, that being the date when the valuation was to take place, but they did not go, and word was received from Chicago not to forward them.

We think the people will not be

slow to perceive that the President's anti-trust campaign is proving effective all around. It is checking the tendency toward great combinations. It is arousing the opposition of the men who put selfish interests above the interests of the public, and it is drawing to the President increased confidence from the people.—Post.

Mountain Chautauqua.
Mountain Lake Park, Maryland. On the Crest of the Alleghany Mountains.

Unquestionably the most superb and sensible summer resort in America. 2,500 feet above sea level, \$350,000 invested in improvements and still the place retains its charming rural simplicity. Five hotels and 100 cottages open for boarders at reasonable rates. This resort is the site of the "Mountain Chautauqua" and summer schools, and is annually visited by thousands of persons who are strengthened in mind by the unexcelled facilities afforded for educational work and invigorated in body by the health giving influence for which this paradise of the mountains is famous.

Excursion tickets may be obtained over the B. & O. South-Western from June 1st to September 30th, good returning until October 31st 1902. Specially low rates during July and August for the Chautauqua and other gatherings. Information about attractions, entertainments, summer school sessions, etc., will be furnished in reply to inquiries addressed to L. A. Russell, Mountain Lake Park, Maryland.

For information on the subject of rates and time of trains apply to Ticket Agents B. & O. S-W. R. R. or the undersigned.

of free trade or of a drastic revision of the tariff, involved in a Democratic triumph, become a disturbing factor the moment the result was known? Fear seized the men of commerce the day after Cleveland's election in 1892 and prices immediately began to fall, panic and business reverses following quickly after. Do the people desire a repetition of those days? Do they wish to endanger the widespread prosperity that now prevails? As the campaign goes on that will daily become more and more clearly the real issue.—Brooklyn Standard Union.

Artistic Monuments

COST NO MORE THAN PLAIN ONES IN White Bronze.

Marble is entirely out of date. Granite soon gets moss-grown, discolored, requires constant expense and care, and eventually crumbles back to Mother Earth. Besides, it is very expensive. White Bronze is strictly everlasting. It cannot crumble with the action of frost. Moss-growth is an impossibility. It is more artistic than any stone. Then why not investigate? It has been adopted for nearly one hundred public monuments and by thousands of delighted customers in all parts of the country. It has been on the market over 25 years and is an established success. Many granite dealers have bought White Bronze for their own burial plots. We have hundreds of beautiful designs of all grades of work, and want to have you see them if you are interested in a monument, headstone, marker or grave-cover. On receipt of a postal card will be pleased to call with designs and sample of White Bronze.
Yours truly,
D. J. RHOADS, Beaver Dam, Ky.
Agent for the Monumental Bronze Co., of Bridgeport, Conn.
